

# The 20 Housing Units that Can Transform Lives with Your Support

Built on the third floor of Siloam Mission's building at 300 Princess Street, this is a structured living space for people who have completed addiction recovery and need stability, support, and safety.

From the kitchen to the dining room to the laundry room and more, everything is laid out to save space but maximize comfort and connection.

The apartments are small but comfortable living areas. They're private, safe, and secure, so that people can focus on moving forward with their lives.

Siloam Mission staff will be there to provide guidance and assistance. There's also a complete security system to ensure everyone's safety.

Please give now and join other kind and caring Manitobans in raising \$400,000 to build 20 recovery housing units so people completing addiction recovery can have a fresh start for a new life.
